The SASOL logo, featuring a circular emblem with a stylized sun or flower design in the center, surrounded by the text 'SASOL' at the top and 'SOUTH AFRICA' at the bottom.

02 Home

Each person pins the modules they use. Everything works from the keyboard: arrow keys move between tiles, and anyone can give a tile their own shortcut.

03 Point of sale

At the till, search is instant and matches every word in any order. Each result shows the stock at every branch and warehouse, so nobody has to phone around.

07 Customers

Each customer carries a running account: open invoices, payments, credits and a statement you can print. Aged debtors shows who is late, and by how much.

08 Invoice history

Invoice history tells the whole story of one sale: what was handed over and when, which vehicle took it, and anything that came back.

20 Reports

Reports open on a dashboard of sales by branch, person and department, with journals, margins, tax, stock valuation and aged debtors one click away. Every report exports.

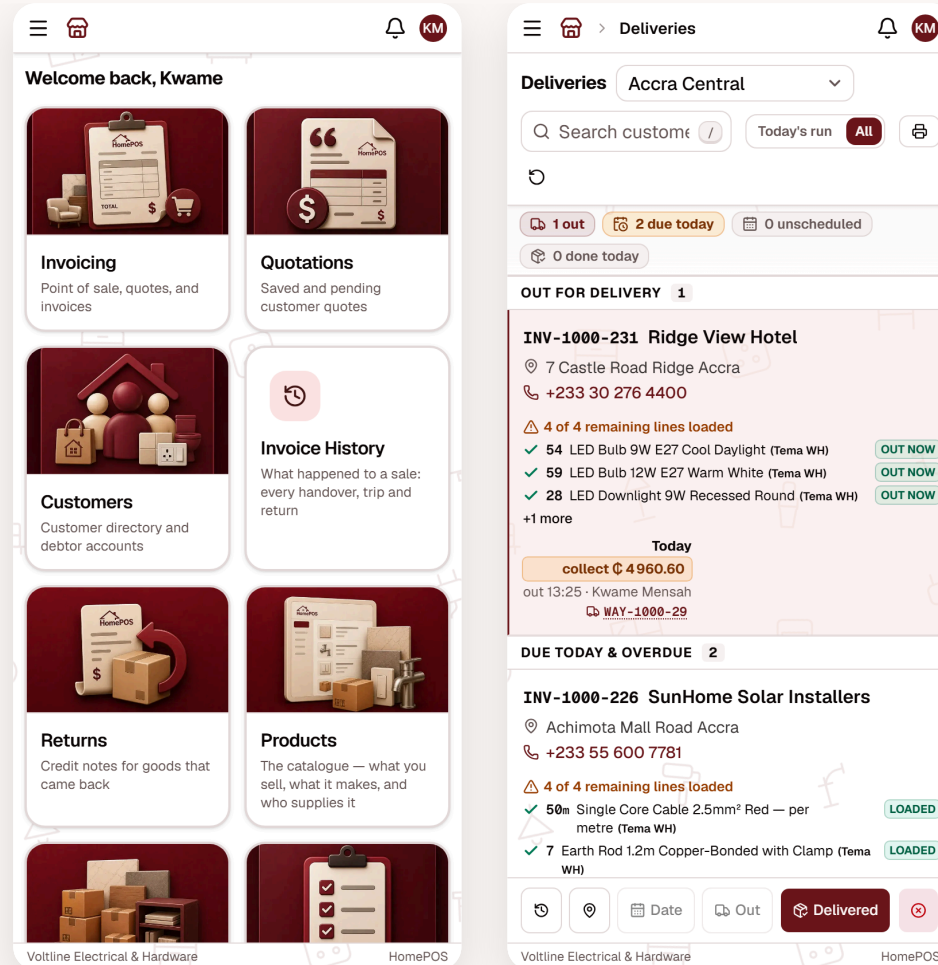

21 Settings

Branches, users, tax rules, tenders and approval limits are all set in the app. Invoices and quotes are designed on a live preview, so they carry the business's own branding.

22 On the go

It works on a phone too: drivers run their deliveries from it, and managers check stock and sales from anywhere.
